SALIM AL-YAAQOUBI

A new graduate with a bachelor's degree from Oman's National University of Science and Technology is studying IT management for business. With a solid academic background and a keen interest in utilizing technology to promote company success, I'm eager to start a career that will allow me to have a significant effect in the rapidly changing IT industry. I work very hard and pick things up quickly. Three qualities fundamental to who I am are confidence, calmness, and optimism. I'm eager to use my expertise, technological know-how, and abilities in the work. I think any business I work for will find me to be an asset. I'm open to taking advantage of business internship possibilities that will allow me to learn and acquire experience by working with many skilled and professional individuals and contributing my competencies and skills to the IT industry. knowledgeable about using data to provide practical answers to business problems and about using data mining and data visualization to produce insightful discoveries. Good technical skills and understanding of computer languages, data analytics, and data visualization.
